I'm for your bill to hold doctor's accountable but let me tell you I also feel senators too. I have had unfortunate past experiences bringing up something related to healthcare more than several years ago when I didn't have the Medicaid to cover the 20 percent for medicines just to hear it used as a brunt of jokes and laughing about it by a few senators mock me ,belittling behind my back at a place of employments, 2-3 work sites not taking into considering who they were talking to. Did you know that was dangerous now I haven't seen a doctor in over two years. It gave me the impression you all including many of those bigoted brown nosed snobs who are actually evil doers love to sabotage people as a stepping stone only to waste time demotivating me even if I could be helpful and encouraging me to give a shit about somebody else who could be in jeopardy.

I was given the last rites for COPD in March 2015 because the bypass machine at Guam memorial hospital was broken. The doctors such as Dr Mariah is caring even banned cleaning due to dusts and chemicals indefinitely so I can never do that for a job.

Another about twenty years ago I had partial anesthesia to stitch up a tracheostomy done by a very competent ears nose and throat doctor and surgeon, Dr Lancer who had transferred to Guam from Sam Francisco General so he knows what he's doing. However, I could hear him cussing and stressed out looking for sharper stencils.

My point is even if the doctors are very competent and know how to do their job how do you expect them to do a job right or at all without the equipment?
